I am an employment attorney and have 25 years of experience in the field. I am certified in Positive Discipline, Mindfulness and Motivation by Appreciation. While litigating employment claims I realized lack of documentation and failed relationships with employees were at their core. While managing a large group of employees, I developed a 3 skills emotional intelligence method to connect with employees which is relevant for Digital Age managers. I wrote a book about it. I also developed a method for having difficult conversations with employees that yield positive results. I can also help and train with federal employment law compliance.
